## Carbon Fibre Tweezers with Replaceable Tips!

Lindstrom offers a new replaceable tip feature on five of our most popular carbon fibre tweezers. These high quality Swiss tweezers are ideal for use where an optimal balance between stiff tips and smooth surfaces is required. Typical applications include handling and placing of electronic components and devices.

- ESD safe for use on sensitive electronics assembly
- Replaceable tips offer lower replacement costs
- Good heat resistance (190°C / 342°F) for positioning components and devices in high temperature environments
- Very high rigidity and strength for precise applications
- Nylon-based carbon fibre offers excellent chemical resistance
